
Jack R. Scholl, AICP, AIA
Senior Principal

Jack R. Scholl has extensive experience in both public and private sector land and community planning, site design, urban design, strategic planning, riverfront development, transportation planning, client liaison and agency coordination. He specializes in the analysis of real estate and land use plan-oriented problems that require strategic to economic and physical solutions.

His extensive and successful work for private developers has given him an understanding of the needs, concerns and economics of private development. He has also had the opportunity to work in public forums and to develop plans sensitive to region-wide needs. With this knowledge, he has prepared effective comprehensive plans and zoning ordinances as well as development guidelines for the public and private sector. Each has been designed to provide a level of public control without unduly impeding the economic viability of proposed development projects.

As part of the consensus building processes, Jack has led and coordinated many planning teams and community groups, which were responsible for plans of regional significance.

EP&D | Environmental
Planning & Design, LLC

Professional Experience:

1969- present
Environmental Planning & Design, LLC

1967-1969
